

Commercial Roll Up Doors

If you want a motorized operator, or have limited space at the sides of the opening for storing the door curtain, choose on overhead rolling closure. Our overhead rolling grilles have a just as much selection of materials, patterns, and finishes and colors as our side folding models.

This is a great door for securing retail spaces, pharmacies, **"store within a store"** spaces, and counters like airport kiosks. The curtain arrives already wrapped on the barrel, and it's ready to just lift into place for your contractors. The roll itself is also much lighter than others, making for easier handling.

Lift Ready Rolling Doors

| Lift Ready | Vortex | Solid Aluminum | 150 [3810] | 288 [7315] | 2.375 [60] | 1.63 lb/ft ² [8 kg/m ²] |

If you have tight deadlines, a small installation budget, or a lot of doors to install, the Lift Ready Roll Up Security Door is a great solution. It's available for spaces up to 24' wide by 12' tall. Larger dimensions can be created for custom doors.

The Lift Ready header plate is more compact (only 15" [381] square) than with other doors of the same size for a cleaner visual look.
