**They're easy to move, fully self-supporting, and can be locked to posts for long-term deployments. Incredibly useful for facilities with seasonal changes or ongoing renovations.**

Roll and Fold

# Features And Options

## Brackets

- ✓ Heavy Duty Hinge with 140 Degree Max Open
- ✓ Fixed Wall Bracket with 180 swivel
- ✓ Durable Powder coat finish

## Caster

- ✓ Large 2in [51mm] swivel caster with Brake
- ✓ Non-Marking Polyolefin wheel
- ✓ Corrosion Resistant Bright Zinc Finish
- ✓ Hardened Steel Load Bearings

## Anti-Sway

- ✓ The latch is specially designed to keep the entire curtain together when the Roll and Fold is being moved from storage to deployed position.
- ✓ Anti-Sway Braces Provides Optimal Panel Spacing During Remote Storage
- ✓ Corrosion Resistant Bright Zinc Finish

## Locking

- ✓ Wall Channel posts include a full height extruded piece of aluminum that is secured permanently to a wall and to the end of the Roll and Fold. Contain cylinders with secure side and public side activating hook bolt lock engaging wall channel.
- ✓ Wall Channel Mounting Tubes are a 3in [76] x 3in [76] x 78in [1981] steel tube with a 5in [127] x 7in [178] steel floor base.
- ✓ Bi-Part posts joins two or more sections of Roll and Folds. With cylinders secure side and public side. This is great for extremely long doors.

## Cylinders

- ✓ Variety of factory installed cylinders available
- ✓ Field swappable
- ✓ Standard Mortise Cylinder (Yale Keyways)
- ✓ Small Format Interchangeable Core (SFIC)
- ✓ Large Format Interchangeable Core (LFIC Schlage Core)
- ✓ Manually Operated Thumb Turn

## Color Options

- ✓ Anodized finishes come standard in clear anodized and optional black, bronze, light bronze, and champagne.
- ✓ Unlimited powder coat colors available.

Roll and Fold	Paravent	Perforated Steel	78 [1981]	Unlimited	36 [914]
Roll and Fold	Prestige	Polycarbonate	78 [1981]	Unlimited	36 [914]

### Rest Easy About The Secured Area Staying Secured

The Roll and Fold is fully self-supporting. The hinges open to a maximum of 140° to ensure staff can't accidentally open it so wide when deploying. The casters are lockable to prevent accidental drift.

If you need to lock the Roll and Fold in place for any length of time, you can request locking wall posts or posts that bolt to the floor.

### Send The Right Message With The Right Design

You can achieve a variety of looks with the Roll and Fold to send a stronger or softer security message, and harmonize with the branding of the space.

Construction options include rod and link, clear polycarbonate panels, and perforated steel for a mesh-like effect. All aluminum parts are available in a variety of anodized and powder coat colors.

### Circumvents Existing Structures In Larger Spaces

It's easy to get around obstacles like support columns or kiosks in larger spaces. Just let us know about any existing features your Roll and Fold has to get around, and we'll provide the right width

**RF Paravent Model**

They're easy to move, fully self-supporting, and can be locked to posts for long-term deployments. Incredibly useful for facilities with seasonal changes or ongoing renovations. This crowd control system is extremely popular with airports and other large venues that want a barrier system that's easy to move and doesn't require floor or ceiling tracks.
